

MOHANAD MOHAMED REDA ABOZEID

COMPUTER SCIENCE STUDENT

Cairo, Egypt | +20 1002326494 | mohanad.mohamedreda@gmail.com | [linkedin.com](https://www.linkedin.com) | github.com

PROFESSIONAL SUMMARY

Computer Science student at MSA University with hands-on experience in machine learning, computer graphics, and software development. Built AI, simulation, and game development projects using Python and C#. Seeking an internship opportunity to contribute to professional projects while further developing my skills and industry knowledge.

EDUCATION

Bachelor of Computer Science | Expected Graduation: 2027

Modern Sciences and Arts University (MSA)

GPA: 3/4.00

Relevant Coursework: Data Structure, Algorithms, Database, Machine Learning, Computer Networks, Operating Systems, AI, Neural Networks, Compiler Design, Image Processing, Information Retrieval, Multi-Media programming, Computer Graphics, Discrete Mathematics, Digital Logic, Object Oriented Programming, Operation Research, Computer Organization.

EXPERIENCE

YUGEN Project Showcase | MSA University

- Selected to present the YUGEN platform at a university Computer Science event.
- Demonstrated software functionality and collaborated with project team members.

LeBaladna Volunteer Work | MSA University

- Assisted in meal preparation and distribution activities throughout Ramadan.
- Collaborated with volunteers to support community service initiatives.

PROJECTS

Plant Disease Detection System | Python, MobileNetV2, Attention CNN

- Trained CNN, MobileNetV, and Attention-Based CNN models for plant disease classification.
- Achieved 92.7% accuracy, 92.1% Precision and 90.5% F1-Score using MobileNetV2.
- Developed a Gradio interface providing the top disease predictions from uploaded images.

Dinosaur Fossil Species Classification | Python, ResNet50, ConvNextV2

- Created a custom dataset for dinosaur fossil skull classification due to the lack of public resources.
- Improved ResNet50 performance from 62% to 92% weighted accuracy through transfer learning and fine-tuning.
- Developed a Gradio interface providing the top prediction of the dinosaur species from the image.

Roller Coaster Simulator | C#, Windows Forms

- Developed an interactive roller coaster simulation using mathematical formulas for line, circles and Bezier curves.
- Implemented gravity and friction mechanics affecting the coasters velocity in run time.
- Designed a dynamic track editing system with automatically updating connected segments.

TECHNICAL SKILLS

Programming Languages: C#, Python, C++, JavaScript, TypeScript, SQL

Machine Learning: TensorFlow, Pytorch, Scikit-Learn, Pandas, NumPy

Web Development: HTML, CSS, React, Node.js, Express.js

Databases: PostgreSQL, MySQL, Supabase

Tools: Git, GitHub, Docker, Visual Studio, VS Code, Google Colab, Gradio

CERTIFICATIONS

HCIA - Security V4.0 | Huawei | Continuance Learning Center (CLC) & MSA University | Aug 2026 | 40 Hours

HCIA - Bigdata | Huawei | Continuance Learning Center (CLC) & MSA University | Jul 2026 | 40 Hours
